

OFFICIAL COMPETITOR BRIEF

Risk Across Tails and Timescales

ROUND 1 - INITIAL SCREENING CHALLENGE

SUBMISSION DEADLINE

Wednesday, 7 October 2026 - 23:59 (Sri Lanka time)

Late submissions will not be marked.

The Challenge

Market risk models usually assume one horizon and one dependence structure. Real markets do not: assets may move together in a crash but not on a normal day, and co-move differently over days than over months.

Build a market-risk framework that combines **copulas** and **wavelets** for a portfolio of your choice, and use it to answer one question:

Does tail dependence change with the investment horizon, and what does ignoring this do to a portfolio's measured risk?

The portfolio, assets, markets, period, risk measure and models are your decisions. **Justify each one.** Your framework must be tested out-of-sample against a simple benchmark, and you must end with one concrete recommendation a risk manager could act on tomorrow.

SUBMISSION REQUIREMENTS

What to Submit

- **Report:** PDF, maximum 10 pages including figures and tables (cover page and references excluded).
- **Code:** Python or R, complete and ready to run.
- One command must reproduce every number and figure in the report.
- Include a README, dependency list and the data used, or a script that downloads it from a public source.
- **Final submission:** one ZIP file per team, maximum 25 MB.

JUDGING FOCUS

Creativity | Technical rigour | Clarity of explanation | Quality of code

A simple idea explained well beats a complex one explained badly.

Rules

Any public data and any tools are allowed. Every team must be able to explain every line of the code and every claim in the report; the next round may test this. Results that cannot be reproduced from your code will be treated as unsupported.

IMPORTANT - USE OF AI TOOLS

AI tools may be used for learning, coding assistance, debugging and drafting. However, each team remains fully responsible for every methodological choice, line of code, calculation and statement in its submission.

Any material use of AI tools must be disclosed in a short appendix or README. Teams selected for the next round may be asked questions about AI use and may be required to explain, modify or reproduce their work live.

SUBMISSION WORKFLOW

How to Submit Your Team Work

Use the **Competition Page** and complete the process below before the submission deadline.

1

Open the Registration Gateway

On the Competition Page, go to the Registration Gateway and click the "Submit Team Work" button.

2

Verify Your Team

Enter the team Tracking Code and the Team Leader's email address.

3

Choose Submission Type

Select the "General / Final Submission" option.

4

Upload the ZIP File

Upload one complete ZIP file containing all required submission materials. Maximum file size: 25 MB.

5

Upload to Google Drive

Upload the final project/submission folder to Google Drive. Ensure the required reviewers/judges have full access to open and review the files without requesting additional permission.

6

Add the External Project Link

Copy the Google Drive sharing link and paste it into the "External Project Link" field in the submission form.

7

Submit and Verify

Before final submission, re-check the Tracking Code, leader email, submission type, ZIP file, file size, Drive permissions and external link.

FINAL CHECK

Pre-Submission Checklist

☐	Tracking Code is correct.
☐	Team Leader email address is correct.
☐	"General / Final Submission" is selected.
☐	ZIP file contains the report, runnable code, README, dependencies and required data/download script.
☐	ZIP file size does not exceed 25 MB.
☐	Google Drive folder contains the final project/submission materials.
☐	Google Drive access permissions allow judges/reviewers to open the files without requesting permission.
☐	External Project Link has been entered correctly and tested.
☐	Any material AI use is disclosed in the README or short appendix.
☐	Submission is completed before Wednesday, 7 October 2026 at 23:59 Sri Lanka time.

Screening & Next Stage

The initial screening will take place after the submission deadline. Approximately **3-4 days** are allocated for the judges to screen the applications before the next-round communication is issued.

FINAL REMINDER

Submit early enough to test your ZIP upload and Google Drive link. Late submissions will not be marked.

Thank you, and best wishes to all participating teams.
